Heat load	100 000 W
-----------	-----------

Mass flow rate in the Hot side	2.457 t/h
--------------------------------	-----------

Inlet water temperature in the hot side	65 °C
---	-------

Outlet water temperature in the hot side	30 °C
--	-------

Allowable pressure loss in the hot side	25 kPa
---	--------

Operating pressure in the hot side	16 bar
------------------------------------	--------

Mass flow rate in the Cold side	1.720 t/h
---------------------------------	-----------

Inlet water temperature in the cold side	5 °C
--	------

Outlet water temperature in the cold side	55 °C
---	-------

Allowable pressure loss in the cold side	25 kPa
--	--------

Operating pressure in the cold side	10 bar
-------------------------------------	--------

Surface reserve	10 %
-----------------	------

Maximum flow velocity in tubing	2 m/s
---------------------------------	-------

Type of heat exchanger	Modular
------------------------	---------
