 (DN250-400)

Page 5

Features:

- Position indicator as standard
- Travel limiter
- Non-rising handwheel
- Non-rotation lock for all nominal diameters
- External stem thread
- Free of FCKW and PCB
- Complete insulation possible according to the german „Energy saving order - EnEV“
- Integrated pressure gauge studs as standard

Combined flow regulating valve - straight through with flanges and special spindle seal (Grey cast iron)

myValve® - Valve Sizing-Program

Contents:

Module ARI-Combined flow regulation ASTRA/ASTRA-Plus-Calculatoin

- Sizing of valve-size with given temperature, flow and operating pressure

Media:

Integrated media-data bank (more than 160 media) with conditions:

- Vapours / gases
- Steam (saturated and superheated)
- Liquids

Special features:

- Project administration of the calculation and product data incl. spare part drawings concerning to project and tag number
- Direct output or calculation and product data in PDF format
- Product data could be taken for a direct order
- SI- and ANSI-units with direct conversion to another data bank
- Settings with over pressure or absolute pressure
- All ARI valves are integrated in a data bank
- Direct access relating to the product on data sheets, operating instructions, pressure-temperature-diagram, controller characteristics, spare part drawings and CAD-symbols on the website.
- Operation in company networks possible (no complex installations on individually PC's necessary)
- Extensive catalogue extending over several product groups

System requirements:

Windows operating systems, Linux, etc.

Balancing instrument ARImetec®-DX

For flow and differential pressure measurement in hydraulic systems

- Sensor device and hand terminal (Industry PDA)

- Optional: Sensor device and **Smartphone App** (Android, incl. 2 licences)

(refer to separates Data sheet)
