

VITOCELL 300-B/300-W

DHW cylinder with 2 internal indirect coils 300 and 500 litre capacity

Datasheet

Part no. and prices: See pricelist

Floorstanding stainless steel DHW cylinder With 2 internal indirect coils

- Lower indirect coil for DHW heating via solar collectors
- Upper indirect coil for DHW reheating via a heat generator

VITOCELL 300-B

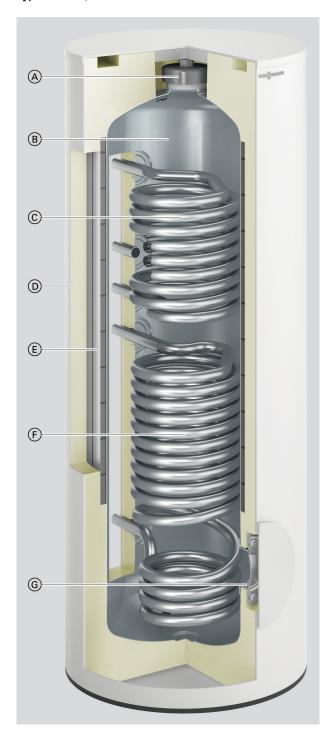

Vitosilver 300 I, type EVBB-A Vitopearlwhite 500 I, type EVBA-A

VITOCELL 300-W

Vitopearlwhite 300 I, type EVBB-A

Benefits

Type EVBB-A, 300 I

- (A) Upper inspection and cleaning aperture
- B Stainless steel cylinder
- © Upper indirect coil DHW is reheated via the heat generator.
- (D) Highly effective all-round thermal insulation
- (E) Vacuum-insulated panel
- F) Lower indirect coil connection for solar collectors
- Front inspection and cleaning aperture (also for installation of an immersion heater EHE)

- Long lasting product thanks to corrosion-resistant stainless steel cylinder
- Hygienic and made to food hygiene standards with high surface quality
- Easy to maintain and no protective anode required, meaning no additional subsequent costs
- Internal indirect coils that stretch right down to the cylinder floor heat up the entire water content
- High DHW convenience through rapid, even heat-up via generously sized indirect coils
- Equipped with vacuum-insulated panel for low heat loss (with 300 I cylinder capacity)
- Easy handling through light weight and removable thermal insulation (500 I capacity)
- For dual mode DHW heating in conjunction with solar collectors and heat generator. The heat from the solar collectors is transferred to the DHW via the lower indirect coil.

Benefits (cont.)

Delivered condition

Type EVBB-A

DHW cylinder with 300 I capacity:

- Attached vacuum-insulated panels
- Sheet steel casing, epoxy-coated: Vitopearlwhite or Vitosilver
- Adjustable feet
- Cylinder and internal indirect coil made from stainless steel
- Clamping device for securing immersion temperature sensors to the cylinder jacket, with fixing points for 3 immersion temperature sensors
- Threaded elbow with sensor well: Internal diameter 6.5 mm
- Integral welded sensor well (internal diameter 7 mm) for cylinder temperature sensor

Type EVBA-A

DHW cylinder with 500 I capacity:

- Removable thermal insulation
- Polystyrene casing: Vitopearlwhite
- Adjustable feet
- Cylinder and internal indirect coil made from stainless steel
- 2 clamping devices for securing immersion temperature sensors to the cylinder jacket, each with fixing points for 3 immersion temperature sensors
- Threaded elbow with sensor well: Internal diameter 6.5 mm
- 2 thermometers

Specification

Information on the upper indirect coil

The upper indirect coil is designed for connection to a heat generator

Information on the lower indirect coil

The lower indirect coil is designed for connection to solar collectors. To install the cylinder temperature sensor, use the threaded elbow with sensor well included in the standard delivery.

Information on continuous output

When designing systems with the specified or calculated continuous output, allow for a matching circulation pump. The stated continuous output is only achieved if the heat generator's rated heating output is ≥ the continuous output.

Sizing entry points

The actual dimensions of the DHW cylinder may vary slightly due to manufacturing tolerances.

Design information

Heating water flow temperatures in excess of 110 °C

For these operating conditions, DIN 4753 recommends the installation of a type-tested high limit safety cut-out in the DHW cylinder, which limits the temperature to 95 °C.

Design information (cont.)

Warranty

Our warranty for DHW cylinders requires that the water to be heated meets the DHW quality in accordance with current potable water regulations and that existing water treatment systems work properly.

Heat transfer surface

The corrosion-resistant, protected heat transfer surface (DHW/heat transfer medium) complies with EN 1717/DIN 1988-100 version 2.

Intended use

The appliance is only intended to be installed and operated in sealed unvented systems that comply with EN 12828 / DIN 1988, or solar thermal systems that comply with EN 12977, with due attention paid to the associated installation, service and operating instructions. DHW cylinders are only designed to store and heat water of potable water quality. Heating water buffer cylinders are only designed to hold fill water of potable water quality. Only operate solar collectors with the heat transfer medium approved by the manufacturer.

Intended use presupposes that a fixed installation in conjunction with permissible, system-specific components has been carried out.

Commercial or industrial usage for a purpose other than heating the building or DHW shall be deemed inappropriate.

Any usage beyond this must be approved by the manufacturer for the individual case.

Incorrect usage or operation of the appliance (e.g. the appliance being opened by the system user) is prohibited and results in an exclusion of liability.

Incorrect usage also occurs if the components in the system are modified from their intended use (e.g. through direct DHW heating in the collector).

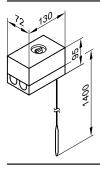

Adhere to statutory regulations, especially concerning the hygiene of potable water.

Accessories

Temperature controller

Part no. 7151989

- With a thermostatic system
- With selector on the outside of the casing
- Without sensor well
- With top-hat rail to be fitted to the DHW cylinder or the wall

Specification

Connection	3-core lead with a cross-section of
	1.5 mm ²
IP rating	IP 41 to EN 60529
Setting range	30 to 60 °C, adjustable up to 110 °C
Switching differential	Max. 11 K
Breaking capacity	6 (1.5) A 250 V~
Switching function	With rising temperature from 2 to 3
	3 0 2 9 ++ 0 1
DIN registration number	DIN TR 1168
	•

Safety assembly to DIN 1988

- Part no. 7180662 10 bar (1 MPa)
- AT: **Part no. 7179666** 6 bar (0.6 MPa)
- DN 20/R 1
- Max. heat input: 150 kW

Components:

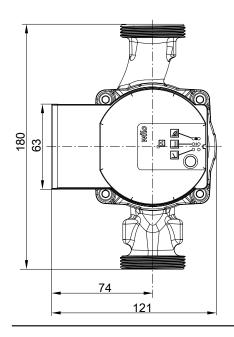

- Shut-off valve
- Non-return valve and test connector
- Pressure gauge connector
- Diaphragm safety valve

Thermometer, digital

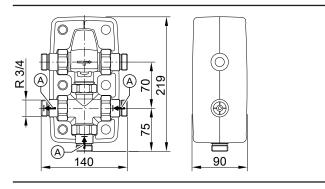

Part no. ZK05265

- For wall mounting
- Digital display of two temperatures

Thermostatic DHW circulation set

Part no. ZK01284

Non-return valve

For limiting the DHW outlet temperature in DHW heating systems with DHW circulation pipe

- Automatic thermostatic mixing valve with bypass line
- Integral non-return valves
- Removable insulation shells

Specification

Transport aid

Part no. ZK05266

For easier handling of vertical DHW cylinders.

- For cylinder capacity up to 300 litres
- For DHW cylinders with rigid PUR foam thermal insulation

Transport aid

Part no. ZK01793

For easier handling of vertical DHW cylinders.

- For cylinder capacity 500 litres
 For DHW cylinders with removable thermal insulation

Subject to technical modifications.
