

## Data sheet

# Standard JIP™ ball valves

## Description

Danfoss Standard JIP™ ball valves is a range of reduced bore shut off valves developed for District Heating and District Cooling networks, with circulating medium.

It is a range of steel ball valves with fully welded body.

The valve design makes them ideal for building installation due to:

- Energy saving: with optimum flow design valves have highest kv on the market and consequently lowest pump energy costs.
- Long lifetime and optimal tightness due to design and material selection in ball seal (carbon reinforced PTFE) and stem seal (graphite).
- The valves are maintenance free, besides the shut off valves in the core distribution network Danfoss offers a range of supplementary valves, e.g. hot tap valves, branching valves, twin valves and draining valves.

**Main data:**

- DN 15-600
- $k_{vs} = 8-26300 \text{ m}^3/\text{h}$
- PN 16 / 25 / 40
- Leakage rate A (according to EN12266-1) - both directions
- Temperature: 0 ... 180 °C
- Medium: Circulation water / glycolic water up to 50 %
- Min. storage and transport temperature: -40 °C

**Approvals and norms:**

- 100 % final inspection. Leak and shell test as well as dimension and functionality test is performed on each and every valve according to applicable standard (EN 12266 part 1 P10-P11-P12 & part 2 F20).
- PED Directive 2014/68/EU Modul H1
- Danfoss A/S is certified according to ISO 9001
- Furthermore certified according to ISO 14001 and ISO45001.

AUMA NORM electrical actuators for Danfoss ball valves

Danfoss ball valves	Auma Actuators	
DN (mm)	Type	Operating time for 90° turn (s)
65-80	SQ 05.2	16
100	SQ 07.2	32
125-150-200	SQ 10.2	32
250	SA 07.6+GS 100.3+VZ 4.3	142
300-350	SA 07.6+GS 125.3+VZ 4.3	142
400	SA 10.2+GS 125.3+VZ 4.3	142
450-500-600	SA 10.2+GS 160.3+GZ 160.3	207

The actuators can be equipped with various accessories. Control and regulating unit AUMA Matic in the basis design can be supplied. For other mains voltages than 3 × 400V/50Hz or additional questions please contact us.

When commissioning and under certain problematic system conditions, it can be necessary to choose slower actuators to avoid water hammering and oscillations.

For additional information related to the electric actuator ordering, please contact local Danfoss representative.

**Features:**

- 2 limit switches - opening/closing
- 2 torque switches - opening/closing
- Heater
- Blinker switch for operating phase
- Manual operation with hand wheel
- Thermo switch

**Main Data:**

- Nominal voltage: 3 × 400 VAC, 50Hz
- Grade of enclosure: IP 68
- Wiring diagram: TPA 00R1AA-000

**Danfoss A/S**
